Project Description:

Bamoo project aims to showcase various house and apartment designs, providing users with inspiration and ideas for their own homes. The platform allows users to browse through a collection of designs, view images, and gather information about each design, including architectural details, interior decor, and landscaping features. Additionally, users can explore a variety of blog posts related to home design trends, tips, and advice.

The Accessibility Guidelines Implemented

These are the guidelines that we implemented and the details are outlined in the readme file.

- Multiple Languages
- Enough font size
- Search with voice
- Captions and transcripts for videos and alt for images
- Easy to understand forms

- User feedback on forms
- Visible colors
- Dark Mode
- Very quick to respond, minimal
